

Vote Yes on T

To Protect Our Top High Schools!

Our high schools are among the best performing in the state, yet they are also the lowest funded. While locally controlled funding sources haven't increased in more than 15 years, the costs of providing excellent teachers, manageable class sizes, Advanced Placement classes, and academic counselors increase every year. We risk losing great teachers and strong academic programs without Measure T.

Vote Yes on T to:

Continue to provide advanced programs in science, technology, engineering, and math

Maintain manageable class sizes

Provide library services, academic counseling, and career training

Attract and retain highly qualified teachers

Keep classroom technology up to date

Prepare students for college and in-demand careers

Provide instructional equipment, materials, and supplies to compete for college and careers

Every penny from Measure T stays local to benefit our high schools only and cannot be taken away by the State.

Vote YES on T to protect quality education, exceptional teachers, and our property values!
